SUMMARY

AI and Full Stack Developer who turns ideas into working products: multi-agent AI systems, RAG-powered apps and websites built from scratch. Currently an AI and Digital Solutions Associate at Student Grad, leading a team, delivering websites and running Meta and Google Ads campaigns. B.Tech IT graduate (2026) with 4 internships, 8 certifications and a strong mix of Generative AI (LangChain, LangGraph), React.js, Node.js and Agile project management skills.

TECHNICAL SKILLS

Generative AI & LLM: LLMs (GPT), Groq (Llama LLM), RAG, LangChain, LangGraph, Prompt Engineering, Vector Databases, Hugging Face, OpenAI API, AI Workflow Automation
Programming & Backend: Python, JavaScript, TypeScript, SQL, Node.js, Express.js, FastAPI, Supabase, REST APIs, Web Scraping, Pydantic, Docker
Frontend & Databases: React.js, HTML, CSS, Tailwind CSS, MySQL, Firebase, MongoDB, Supabase
Product & Project Management: Agile & Scrum, SDLC, Sprint Planning, Backlog Management, Requirement Analysis, User Stories, MoSCoW Prioritization, Roadmapping, Risk Management, JIRA, Notion, Figma, Power BI
Digital Marketing & Tools: Meta Ads, Google Ads, Git & GitHub, VS Code, Data Structures & Algorithms, OOP

PROFESSIONAL EXPERIENCE

AI and Digital Solutions Associate | Student Grad **Jul 2026 – Present**
- Design and build company websites from scratch for Student Grad, 4PL Academy and 4PL Consultancy
- Lead a team handling different tasks, assigning work accordingly and tracking delivery
- Plan and run digital marketing campaigns using Meta Ads and Google Ads, and apply AI tools to streamline workflows

AI and Automation Intern | Marksman Technologies Pvt. Ltd. **May 2025 – Jul 2025**
- Created an AI meal planner project that generates personalized meal plans and recipes using LLMs, Python, LangChain and OpenAI API
- Built AI automation workflows and LLM-powered agents with REST APIs; implemented RAG with a vector database
- Documented SOPs and supported user testing and feedback analysis

React.js Intern | Celebal Technologies **May 2025 – Jul 2025**
- Created different React.js projects, including 10+ reusable components, improving UI consistency and reducing rework
- Integrated AI-powered APIs and chat interfaces with backend REST APIs; took part in Agile sprint planning and JIRA tracking

IT Intern | Airports Authority of India **May 2025 – Jul 2025**
- Created an admin and customer system project for tracking data for the admin; supported IT monitoring, troubleshooting and documentation

Software Developer Intern | Essentia **Jun 2024 – Jul 2024**
- Created different frontend projects for production websites, improving performance and responsiveness; fixed bugs and integrated third-party APIs

PROJECTS

Multi-Agent Orchestration System
- Built a system where you submit a GitHub project and a hierarchy of AI agents (Planner, Retriever, Executor, Evaluator) talks to each other and solves the problem like a team of real people, then delivers final insights
- Implemented task routing, context sharing and memory with LangGraph; ran Llama locally via llama.cpp, exposed FastAPI APIs and enabled one-click deployment with Docker
- **Tech Stack:** Python, LangGraph, LangChain, FastAPI, Pydantic, Docker, llama.cpp, REST APIs

Folate – AI Web Application Generator
- Built an AI no-code platform that turns natural language prompts into multi-page websites, with authentication, project management and real-time preview
- **Tech Stack:** TypeScript, Node.js, Express.js, OpenAI API, LangChain, Prompt Engineering

AI Meal Planner & Recipe Generator
- Developed a RAG-based app generating personalized meal plans from nutrition data and user goals, with a responsive UI
- **Tech Stack:** Python, LangChain, OpenAI API, RAG, Vector Store, Pandas

Collaborative Video Sharing Platform
- Built secure creator–editor workflows with role-based access control, removing direct credential sharing between users
- **Tech Stack:** JavaScript, Authentication, Role-Based Access Control

EDUCATION

B.Tech in Information Technology | Amity University, Noida (First Division) **2022 – 2026**
Coursework: Data Structures, DBMS, Operating Systems, Computer Networks, Software Engineering, AI, Project Management

CERTIFICATIONS

- Google – Generative AI & Large Language Models
- Google – Project Management Professional Certificate
- Oracle – AI Foundations Associate
- NVIDIA – Fundamentals of Deep Learning
- Microsoft – Career Essentials in Data Analysis & Software Development
- Cisco – CCNA, Cybersecurity Essentials, Python Essentials
- AWS Academy – Cloud Foundations
- IBM – Data Fundamentals
